PRECISION. SHARPNESS. YOUR SUCCESS.

exactly

Reasons why you need LUTZ BLADES:

PRECISION.

Our maxim is precision – and it is this principle that accompanies every stage from the initial idea to the finished product. Right through to the ideal solution for your specific cutting application to ensure your requirements are met. Throughout every design and development stage and every production step – blade after blade after blade.

SHARPNESS.

We have been making blades and cutters since 1922. From razor-sharp, for extremely fine cutting jobs to extremely robust for impact and pressure cutting actions. Together with the customer, we define all the relevant parameters to ensure your individual requirements are met – to provide greater sharpness and better service lifetimes.

YOUR SUCCESS.

exactly

Your competitive advantage when you use custom blades from LUTZ BLADES is the sum of all our efforts and the details we guarantee you. We are pleased to show you those details because your success is our objective – from the first to the millionth blade.

SPECIAL-PURPOSE BLADES AND CUSTOM BLADES FOR INDUSTRIAL AND MEDICAL APPLICATIONS

Whether it is in connection with a specific development project or a production process tuned to meet a customer's needs, our custom blades and special-purpose blades all meet the highest requirements in terms of their geometry, material and coating.

Thanks to rapid prototyping and highly flexible manufacturing technologies we are in a position to manufacture small (and even very small) runs of custom blades in only a few days!

INDIVIDUAL AND FAST – CUSTOM BLADES BY LUTZ BLADES FOR YOUR SPECIFIC APPLICATION

Your cutting application needs a superior cutting tool. Fine-tuned to your specific application in terms of geometry and performance. This is where we come in.

Together, we can work out the exact profile of the new product you need and provide you with initial samples for testing purposes generally within a few days.

THE KEY FEATURES OF CUSTOM BLADES BY LUTZ BLADES ARE THESE

- » Rapid prototyping
- » In-house tool & die shop
- » Flexible manufacturing technologies
- » Broad range of materials
- » Hard and frictionless coatings designed to match the specific application

Our product range covers over 600 designs: serrated, toothed, wavy, curved, notched, multi-sided special-purpose blades and combinations of custom blades with numerous shapes and geometries.

AND THIS IS HOW YOU CAN BENEFIT FROM CUSTOM BLADES BY LUTZ BLADES

- » Excellent cutting results
 - » Less scrap
 - » Greater machine efficiency thanks to fewer blade changes
 - » Consulting and further development during the project
- Special-purpose blades by LUTZ BLADES have the following characteristics:
- » Superior sharpness
 - » High-performance materials
 - » Consistently high quality from the first to the millionth blade
 - » Hard materials and frictionless coating to match the application

LUTZ BLADES - CIRCULAR BLADES AND CUTTERS

Thanks to their razor-sharp cutting edges, their excellent flatness and hardening, our circular blades and cutters have been acknowledged for years as being among the best. Something we keep working on every day! To keep our customers' production rolling.

And this is how you can benefit from circular blades and cutters by LUTZ BLADES:

- » Cleanly cut edge with no edge build-up
- » Less cutting dust
- » High cutting speeds
- » Greater productivity thanks to fewer blade changes

AND THIS IS HOW YOU CAN BENEFIT FROM POINTED BLADES BY LUTZ BLADES

LUTZ BLADES pointed blades are among the best in the market. Thanks to their high quality standard, our pointed blades are popular for many different cutting processes: e.g. in surgery or in processing plastics and leather.

- » Easy plunge cutting in both hard and soft materials
- » Minimised effort and discomfort, e.g. when dotting and puncturing
- » Defined length-of-cut specification
- » Easy use with automatic cutting processes
- » Increased productivity thanks to bi-directional cutting

TOOTHED BLADES AND TOOTHED KNIVES FOR INDUSTRIAL CUTTING JOBS

Do you use toothed blades or toothed knives in your production processes? For cutting film, cardboard or paper? And you are keen to maximise accuracy and efficiency?

Then we are the partner you are looking for to provide peak technical performance.

Here is a selection of our products.

We are always pleased to advise on the design of new blades or the selection of an existing design from our range of products.

CHOICE OF MATERIAL

Our range of products covers blades of between 0.06 and 3.0 mm in thickness and with final hardness ratings of 40 - 85 HRc.

- Our range of materials includes:
- » Carbon steels
 - » Stainless and rust-resistant steels
 - » Highspeed steels (HSS)
 - » Tool steels
 - » Tungsten carbides
 - » Ceramics

COATINGS

The LUTZ BLADES coatings range includes the following choices:

TiN

Standard hard coating with tough resistance to wear with a relatively high coefficient of friction (compared with steel as a reference material: 0.4 to 0.7), usually gold coloured, safe use at up to approx. 300 °C.

TiC

Has lower resistance to wear than TiN and a considerably lower coefficient of friction (compared with steel as a reference material: 0.3 to 0.5), usually charcoal grey.

TiCN

Takes a position between the high wear resistance of TiN and the low coefficient of friction of TiC, relative position between TiN and TiC depending on C and N content, usually charcoal grey.

TiAlN

Has greater resistance to oxidation than TiN with a comparable coefficient of friction, usually charcoal grey.

ZrN

With wear resistance similar to TiN, but with a more dense morphology than TiN and, as a result, more resistant to pitting under comparable load, usually steel colour.

CrN

Lower wear resistance than TiN. The advantage of CrN is it has a lower inherent tension than TiN. As a result, can be used for applications with high bending loads.

DLC

Has a high wear resistance and a low coefficient of friction (approx. 0.4 compared with steel as a reference); sensitive to impacts and high temperatures (between 100° and 300 °C depending on structure).

Teflon® (PTFE)

Non-stick coating Teflon® (PTFE), very low static friction allows a smooth cut, therefore a popular coating for medical devices. Because of the low surface tension almost no contamination from the cut goods. Acid and base-resistant, not suitable in combination with Na (sodium). Temperature resistant up to 250°C (480°F). Medium wear resistance.

Coloured lacquer

Applied to entire surface, acts as an aid to sorting different material thicknesses and as anticorrosion protection.

Bluing and blackening

Applied to entire surface, some anticorrosion protection and thickness protection, also aids differentiation.
